

## Bouygues Asia Family Fun-Day 2007

Quality HealthCare participated in the Family Fun-Day 2007 at AsiaWorld-Expo organized by Bouygues Construction Dragages Asia on 22<sup>nd</sup> September 2007. With raising the awareness on safety and environmental protection being the major aims, the event was also a good opportunity for participants to spend quality time with their families.

Being a caring company, a healthcare team from Quality HealthCare provided free health check services including BMI and blood pressure tests to help the participants understand their health conditions while enjoying in the fun day. As one of the most popular booths, we have successfully enhanced the comers' understanding on some major health issues.
